What is Refraction?

The refraction test, also termed vision test, is an examination that tests an individual's ability to see an object at a specific distance. The test involves looking through a device called a phoropter to read letters or recognize symbols on a wall chart through lenses of differing strength which are contained within the device. (During this process, the eye doctor will ask you "Which is better...one or two?"). This test is performed as part of a normal eye examination to determine whether an individual has normal vision. It is also used to determine the prescription for eyeglasses or contact lenses.

When does Insurance not pay for a Refraction?

Unfortunately, Medicare considers this a *routine* test and therefore does not approve it making it a non-covered service. Since Medicare doesn't cover it, many commercial insurance companies follow suit and also consider it a non-covered service.

Our Policy

We are dedicated to providing our patient with the very best medical and surgical eye care in the Dallas/Ft. Worth area. Therefore, refraction will be performed when medically necessary (This includes all new patients, those presenting with a decrease in vision and on a yearly basis thereafter). Additionally, we are happy to perform a refraction during any visit upon your request. Please keep in mind that most of the time this service will not be covered and you will be responsible for the charge.

Our fee for the refraction is \$47.00, and is collected at the time of your visit, in addition to any co-payments or deductible amounts due for the medical portion of your examination.

I have been informed, I have read the above and I understand the policy regarding refractions.
